

# TABLE OF CONTENTS

Page

## Chapter 1 — Introduction and General Principles

I.	Introduction .....	1
II.	General Principles of Pharmacology .....	2
A.	Routes of Drug Administration .....	2
B.	Properties of a Drug .....	4
C.	Defining A Receptor .....	7
D.	The Chemical Basis for Drug-receptor Interactions .....	9
E.	Drug-Drug Interactions .....	11
F.	Drug Development .....	15

## Chapter 2 — Molecular and Cellular Targets for Drugs

I.	Direct Activation of an Ion Channel .....	16
II.	G-protein Activation of an Ion Channel .....	17
III.	G-protein Activation of a Second Messenger Cascade .....	17
IV.	Receptors Linked to Cytoplasmic Enzymes .....	20
V.	DNA-linked Receptors .....	20

## Chapter 3 — Pharmacokinetics and Metabolism

I.	Pharmacokinetics .....	21
II.	Absorption .....	22
III.	Distribution .....	23
IV.	Metabolism .....	25
V.	Renal Excretion .....	28

## Chapter 4 — The Autonomic Nervous System

I.	Overview of the Nervous System .....	30
II.	Anatomy of the ANS .....	31
III.	Divisions of the ANS (Structural and Functional) .....	32
A.	Parasympathetic .....	32
B.	Sympathetic .....	33
IV.	Physiology of the ANS .....	34

## Chapter 5 — The Parasympathetic Drugs: Cholinergic Agonists and Antagonists

I.	Overview .....	35
A.	Synthesis, Secretion, and Metabolism of ACh .....	35
B.	Introduction to Cholinergic Receptors .....	36
II.	Cholinergic Agonists .....	38
A.	Effects of Muscarine and Muscarinic Compounds .....	38
B.	Effects of Nicotine and Nicotinic Compounds .....	40
C.	Indirect Parasympathomimetics: Anticholinesterase Agents .....	41
III.	Cholinergic Antagonists .....	41
A.	Muscarinic Antagonists .....	41
B.	Nicotinic Antagonists .....	43

## Chapter 6 — The Sympathetic Drugs: Adrenergic Agonists and Antagonists

I.	Neurotransmission at Adrenergic Neurons .....	44
A.	Synthesis, Storage, and Release .....	44
B.	Metabolism .....	46
II.	Effects of Catecholamines on Receptors .....	47
III.	Cardiovascular Effects of Adrenergic Receptor Activation .....	49
IV.	Direct-Acting Adrenergic Agonists (Sympathomimetic Drugs) .....	51
A.	Epinephrine (Epi) .....	51
B.	Norepinephrine (NE) .....	52
C.	Isoproterenol (Iso) .....	52
D.	Dopamine .....	52
E.	Phenylephrine .....	53
V.	Indirect-Acting Adrenergic Agonists .....	53
VI.	Mixed-Action Adrenergic Agonists .....	53
VII.	Adrenergic Antagonists .....	53

## Chapter 7 — Analgesics and Autacoids

I.	Introduction .....	56
II.	Analgesia and the Role of Eicosanoids (Prostaglandins, Thromboxanes, and Leukotrienes) .....	56
A.	Synthesis .....	57
B.	Compounds That Affect Synthesis .....	59

	<u>Page</u>
III. Angiotensin and Antagonists .....	61
A. Synthesis .....	61
B. Actions .....	62
C. Angiotensin Antagonists .....	62
1. Captopril .....	62
2. Saralasin .....	62
IV. The Kinins: Bradykinin and Kallidin .....	62
V. Serotonin and Its Antagonists .....	63
VI. Histamine and Antagonists .....	63

## **Chapter 8 — Drugs Affecting the Respiratory System**

I. Drugs Used to Treat Upper Respiratory Disorders .....	64
A. Nasal Decongestants .....	64
B. Antihistamines .....	64
C. Cough Suppressants .....	65
II. Drugs Used to Treat Asthma .....	65

## **Chapter 9 — Drugs and the Gastrointestinal Tract**

B. Drugs for Heartburn .....	67
B. Drugs for Nausea .....	67
C. Drugs for Peptic Ulcers .....	68
D. Laxatives .....	69
E. Antidiarrheal Drugs .....	70

## **Chapter 10 — Drugs That Affect Blood**

I. Description of Anemias .....	71
II. Drugs Used to Treat Anemias .....	71
A. Erythropoietin .....	71
B. Folic Acid .....	72
C. Cyanocobalamin .....	73
D. Iron .....	73
III. Blood Coagulation/Hemorrhage .....	74
A. Introduction .....	74
B. Anticoagulants .....	74
C. Thrombolytic Drugs .....	78
D. Drugs Used to Reverse Anticoagulation and Thrombolytic Therapy .....	79
E. Antiplatelet Drugs .....	79

**Chapter 11 — Lipid Disorders**

I.	Cholesterol and Its Control .....	80
II.	Treatments That Lower Lipid Levels .....	81

**Chapter 12 — Drugs and The Kidney**

I.	Normal Kidney Function .....	83
II.	Thiazide Diuretics .....	84
III.	Loop Diuretics .....	85
IV.	Potassium-Sparing Diuretics .....	85
V.	Osmotic Diuretics .....	86
VI.	Carbonic Anhydrase Inhibitors .....	86

**Chapter 13 — Hypertension And Its Treatment**

I.	Description of Hypertension .....	87
II.	Sites of Control of Blood Pressure .....	87
III.	Classes of Antihypertensive Drugs .....	90
A.	Thiazide Diuretics .....	90
B.	Alpha- and Beta-Adrenergic Antagonists .....	91
C.	ACE Inhibitors .....	92
D.	Calcium Channel Blockers .....	93
E.	Centrally-Acting Adrenergic Drugs .....	93

**Chapter 14 — Drugs Used to Treat Angina Pectoris  
and Heart Failure**

I.	Overview .....	95
II.	Anatomy and Physiology of Coronary Circulation .....	95
III.	Treatment .....	96
IV.	Heart Failure .....	98
V.	Treatment of Heart Failure .....	99

**Chapter 15 — Antibiotics**

I.	Overview and Mechanisms of Action .....	101
II.	Inhibitors of Cell Wall Synthesis .....	105
III.	Protein Synthesis Inhibitors .....	106
IV.	Inhibitors of Cell Membrane Function .....	108

	<u>Page</u>
V. Inhibitors of Nucleic Acid Metabolism .....	109
VI. Inhibitors of Intermediary Metabolism .....	109
VII. Drugs Used to Treat Mycobacterial Infections .....	111
VIII. Antifungal Drugs .....	112
IX. Antiviral Drugs .....	112

## **Chapter 16 — Cancer Chemotherapy and Gene Therapy**

I. Principle of Selective Toxicity .....	116
II. Alkylating Drugs .....	117
III. Antimetabolites .....	119
IV. Purine Antagonists .....	121
V. Pyrimidine Antagonists .....	121
VI. Antibiotics .....	122
VII. Hormones .....	123
VIII. Anti-mitotic Drugs .....	123
IX. Gene Therapy .....	124

## **Chapter 17 — Drugs And The Central Nervous System**

Synaptic Transmission .....	125
-----------------------------	-----

## **Chapter 18 — Drug Abuse And Society**

I. Overview .....	131
II. Drug Dependence .....	132
III. Tolerance .....	132
IV. Pharmacological Intervention .....	133
A. Treatment of Narcotic Addiction .....	133
B. Treatment of Cocaine Addiction .....	134
C. Treatment of Alcoholics .....	134
V. Conclusion .....	134

## **Chapter 19 — The Opioids**

I. Overview .....	136
II. The Brain's Own Morphine: Endogenous Ligand Theory .....	136
III. Subtypes of Opioid Receptors and Ligands .....	137
IV. Major Central Effects of the Opioids .....	139
V. Peripheral Effects .....	140

	<u>Page</u>
VI. Fate in the Body .....	140
VII. Tolerance and Physical Dependence .....	140
VIII. Morphine Congeners .....	140
IX. Narcotic Antagonists .....	141

## **Chapter 20 — Central Nervous System Stimulants**

I. Overview .....	142
II. Cocaine .....	142
III. Amphetamines .....	143
IV. Caffeine and The Methylxanthines .....	145
V. Nicotine .....	146
VI. Therapy of Stimulant Abuse .....	146

## **Chapter 21 — Drugs For the Major Psychiatric Disorders**

I. Overview .....	148
II. Drugs Used to Treat Schizophrenia .....	149
III. Monoamine Oxidase (MAO) Inhibitors .....	153
IV. Tricyclic and Atypical Antidepressants .....	154
A. Mechanism of Action .....	155
B. Side Effects and Toxicity .....	155
V. Lithium .....	156

## **Chapter 22 — Sedative/Hypnotic Drugs**

I. Overview .....	158
II. General Characteristics of Sedative-Hypnotics .....	158
III. Site and Mechanism of Action .....	159
IV. The Barbiturates .....	160
V. Nonbarbiturate Hypnotics .....	161
VI. Benzodiazepines .....	161

## **Chapter 23 — Alcohol**

I. Overview .....	164
II. Therapeutic Uses of Alcohol .....	164
III. Pharmacology of Ethanol .....	165
IV. Mechanism of Action .....	166
V. Treatment of Alcoholics .....	167

**Chapter 24 — Anesthetics**

I.	Overview .....	168
II.	Types of Anesthesia and Anesthetic Agents .....	168
III.	Anesthetic Drugs Used Intravenously .....	171
A.	Barbiturates .....	171
B.	Benzodiazepines .....	172
C.	Narcotics .....	172
D.	Muscle Relaxants .....	172

**Chapter 25 — Psychedelic Drugs**

I.	Overview .....	173
II.	Classification .....	173
A.	Noncatechol Hallucinogens .....	173
B.	Catechol Hallucinogens .....	174
C.	Indole Hallucinogens .....	176
1.	LSD .....	176
2.	Other Indole Hallucinogens .....	176
D.	Psychedelic Anesthetics .....	177

**Chapter 26 — Introduction to Hormones Used as Drugs and Sex Hormones**

I.	How Hormones Work .....	178
II.	Oral Contraceptives .....	180
A.	Types .....	181
B.	Mechanism of Action .....	182
III.	Estrogen Replacement Therapy .....	182
IV.	Drugs Used for Abortion .....	182
V.	Testicular Hormones and Related Drugs .....	183

**Chapter 27 — Hormones of the Adrenal Cortex**

I.	Overview .....	184
II.	Glucocorticoids .....	184
A.	Physiologic Effects .....	185
B.	Uses of Glucocorticoids .....	186
C.	Preparations .....	187
III.	Mineralocorticoids .....	187

**Chapter 28 — Insulin and Drugs for Diabetes ..... 188****Chapter 29 — Thyroid and Anti-Thyroid Drugs**

I.	Thyroid Hormones .....	191
II.	Thyroid Hormone Deficiency .....	191
III.	Anti-Thyroid Drugs .....	193

**Chapter 30 — Poisonings and Their Treatment**

I.	Types of Poisons .....	195
A.	Naturally-occurring .....	195
B.	Organic Chemicals .....	195
C.	Inorganic Chemicals .....	195
II.	Factors Affecting the Toxicity of Poisons .....	196
A.	Shape of the Dose-response Curve .....	196
B.	Route of Exposure .....	196
C.	Duration of Exposure .....	196
D.	Age .....	196
E.	Sex .....	196
F.	Species .....	197
III.	Principles of Treatment .....	197
IV.	Specific Antidotes .....	198
A.	Competitive Antagonism .....	198
B.	Chelation .....	198
C.	Antidotes that Stimulate Metabolic Conversion of the Poison .....	198
D.	Increasing the Rate of Excretion of a Toxin From the Body .....	198

**GLOSSARY ..... 202**
